CS Prone Plus Head Support System

All CS Medical head and body supports are single use to aid infection control*

- + Cushion protects the patient's face from pressure related injury
- + Adjustable posts to achieve a neutral neckline
- + Mirror assists with patient monitoring
- + Helmet & Mirror sold separately from Prone Plus Face Cushions

CS Prone Plus Face Cushion

- + Distributes the pressure evenly across the patient's forehead and cheekbones.
- + Use the face cushion with the CS Prone Plus Head Support System* to achieve a neutral neckline and to assist with patient monitoring.
- + Compatible with the ProneView® and most other standard helmets and cradles.

*Helmet & Mirror sold separately (see below)

Order Code: CSM-2512 CS Prone Plus Face Cushion (10 Units per box)

Order Code: CSM-2514 CS Prone Small Face Cushion (10 units per box)

CS Prone Plus Head Support System (Mirror & Helmet)

For use with the CS Prone Face and Prone Plus Face Cushions.

- + Adjustable posts help achieve the best cervical spine position for the patient.
- + The helmet can be used without the mirror for lower positioning.
- + Easily cleaned using non-alcohol hospital wipes.

Order Code: CSM-2565 CS Prone Plus Head Support System (Mirror & Helmet) (1 system per box)

Disposable Foam Supports

CS ProneOne™

- + Stand alone face cushion.
- + Mirror included to help monitor patient's eyes and ET tubes.

Order Code: CSM-2520 CS ProneOne (6 units per box)

CS Prone Face Blocks Available in 5" and 7"

- + Soft memory foam provides comfort and protection for the patient.
- + Firm base provides stability.
- + Slot to secure the tubing clear of the patient's face.

Order Code: 7" CSM-2535 CS Prone Face Blocks (8 units per box)

Order Code: 5" CSM-2550 CS Prone Face Blocks (12 units per box)

CS C-Plus Face Cushion

- + Compatible with the Allen® C-Prone and C-Flex®.
- + Distributes the pressure evenly across the patient's forehead and cheekbones.

Order Code: CSM-6100 CS C-Plus Face Cushion (10 units per box)

CS Prone Face Mask

- + Compatible with the Allen® C-Prone and C-Flex®.
- + Protects the patient's face from pressure ulcers.

Order Code: CSM-2530 CS Prone Face Mask (5 units per box)

CS Disposable Lateral Head Support (Adult)

- + Position the patient's head on either side.
- + No need to disconnect tubing, so PEEP pressure can be maintained.
- + Single patient use to aid infection control.
- + Reduces the risk of pressure related injury.
- + Soft foam for patient comfort.

Order Code: CSM-2410 CS Disposable Lateral Head Support (Adult) (20 units per box)

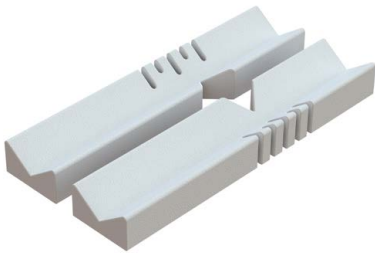

Disposable Foam Supports

CS Disposable Supine Head Support (Adult)

- + Evenly distributes pressure around the back of the patient's head while in the supine position.
- + Position the patient's head on either side.
- + Reduces the risk of pressure related injury.
- + Soft foam for patient comfort.

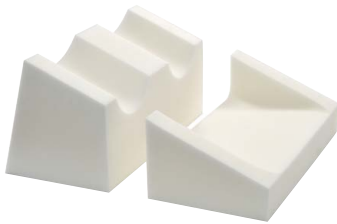

Order Code: CSM-2411 CS Disposable Supine Head Support (Adult) (20 Units per box)

CS Arm Supports

- + Flexible support for the patient's arms while in the prone, supine or lateral position.
- + Notches to support the patient's arms in the most suitable position.
- + Soft foam to help protect the patient from pressure related injury.

Order Code: CSM-2575 CS Arm Supports (12 pairs per box)

CS Adjustable Prone Leg Cushions

- + The unique two-part design makes them fully adjustable to fit most patients.
- + Knee pad to reduce pressure on the patient's knees.
- + Shin support raises the ankles to assist venous return and allow the feet to hang freely.

Order Code: CSM-2590 CS Adjustable Prone Leg Cushions (2 sets per box)

CS Prone Chest & Pelvic Rolls

- + The height of the chest roll aids safe positioning of the patient's head and neck.
- + Enables the arms to be placed in the forward position.
- + Dual supports accommodate the varying statures of the patients.

Order Code: CSM-2902 CS Prone Chest & Pelvic Rolls (2 sets per box)

CS Egg Box Foam

This disposable indented foam provides extra padding for the patient on the operating table or in the recovery room.

- + Use the complete sheet to cover the whole operating table.
- + Tear along the perforations for smaller pieces to fit the patient's arms, legs and chest.
- + Single use to aid infection control.

Order Code: CSM-2585 CS Egg Box Foam (1 unit per box) Other sizes available

Prone Positioning Guide

Head Positioning Guide

While in the supine position

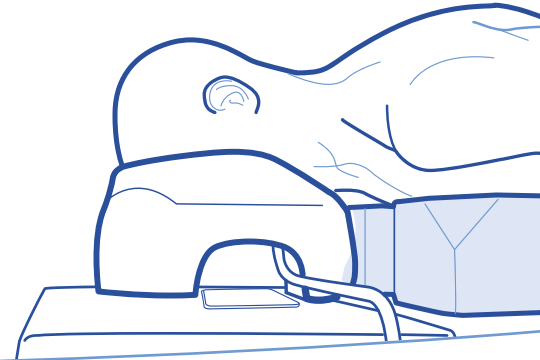

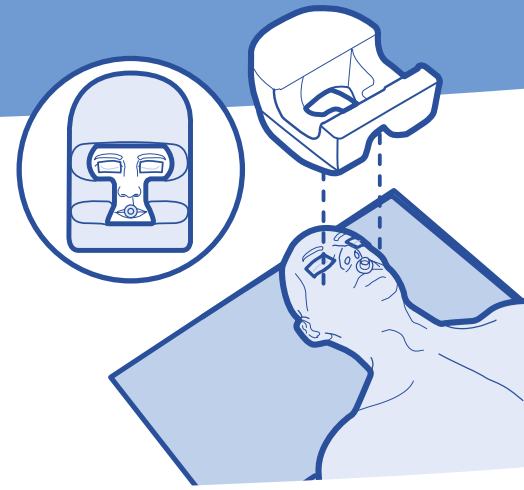

Place the face cushion over the patient's face.

- + Lightly tape the patient's eyes - do not pad.
- + Ensure the brow line is visible.
- + Cushion should support the patient's cheekbones.
- + There must be no pressure on the delicate skin around the eyes.

Turn patient to the prone position

Use the mirror to check the patient's face is still correctly positioned in the cushion. Adjust if necessary.

- + Reconnect the airway tubing, temperature probe etc.
- + Check none of the tubing is trapped between the cushion and the patient's face.
- + Re-check the position of the patient's face and the tubing and adjust if necessary.
- + Check the patient's throat is not resting on the chest support.

Head-to-Toe Check list

At all stages, check that no tubing is trapped between the patient and the supports, and that all bony protrusions are padded. This check should be completed once the patient is in the prone position.

The Head

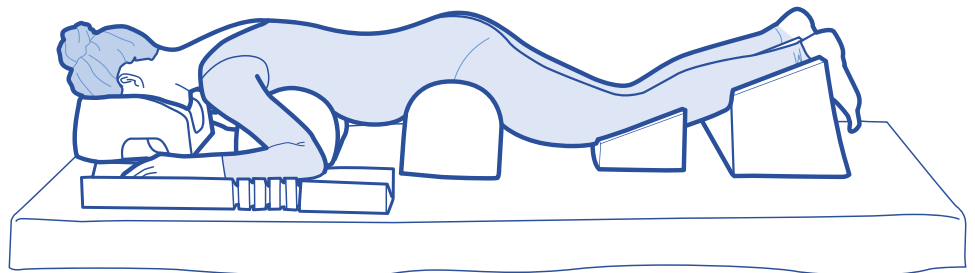

- + Eyes lightly taped, no padding or goggles.
- + Face supported on the cheeks and forehead.
- + No pressure on the nerves around the eyes.

The Arms

- + Arms forward and not abducted beyond 90°, or arms secure by the patient's side.
- + No pressure on the axillary nerve.
- + No body weight supported on the arms.

Neck

- + Chin and throat not touching the chest support.
- + Neutral neckline.

Chest, Abdomen and Pelvis

- + ECG electrodes positioned on the patient's back.
- + Breasts positioned medially with minimum pressure.
- + Adequate space to avoid compression of the abdomen.
- + Male genitalia free of the pelvic support.

Legs and Feet

- + No pressure on the thighs.
- + Knees padded.
- + Ankles raised.
- + Feet hanging free in their own position.
- + No pressure on the toes.

During the procedure

Check the patient's face every 30 minutes while they are in the prone position to ensure they are correctly positioned. Adjust if necessary.

The Kyra Comfort™ Stirrup

The New Standard in Lithotomy Positioning

KYRA COMFORT™ 500 Stirrup ►

500lbs, 227kg patient weight capacity

◄ KYRA COMFORT™ 350 Stirrup

350lbs, 159kg patient weight capacity

KYRA COMFORT™ Features

- **BETTER INFECTION CONTROL:** Non-Velcro Secure-LOK Straps eliminate VELCRO® fastener straps to improve infection control and prolong the life of the pads.
- **MORE PRESSURE REDUCING PADDING:** Kyra Medical's unique stirrup design 1. allows ½" more padding for pressure relief than traditional stirrups 2. Unlike traditional boot pads, Kyra's pad protects the medial and lateral aspect of the ankle.
- **UNPARALLELED PELVIC SITE ACCESS FOR ROBOTIC ASSISTED PROCEDURES:** Wide lithotomy range of motion from +85° to -55°. The unique patent pending design provides 22° more lithotomy range of motion than traditional stirrups. Abduction range +25° -9°
- **ELIMINATES DANGEROUS PINCH HAZARDS:** The Stirrup's curved support rods eliminate dangerous pinch hazards that traditional stirrups present.
